Testimonials.....✍️

The IAD awards is a wonderful platform for established Interior Designers & Architects who are able to display their creative talent at a National Level. Apart from those who have taken first steps into mainstream designing, these awards also provide a wonderful opportunity to students of design to showcase their talent. The planning and through professionalism with which these awards are organized, keeping the minutest of details in mind over the period of many months, encourages participants to give in their best.

It was an honor for ZZ Architects to win so many prestigious awards from IAD this year. The quality of the all the participating firms and winners makes this even more special. I would personally like to specially applaud your team for having initiated awards for young designers and also institutions. The encouragement given to the young minds is the need of the hour. The function and venue itself was interestingly informal, for us it was a first hand experience of the hospitality that Delhi is so famous for. Team ZZA wishes you the very best for the coming years....."
